**MYWHITE\_\_** is a family of wall lights and ceiling light fixtures designed for exterior spaces but also suitable for interiors characterized by an essential and clean design. They are perfect to create evocative compositions that can enhance any environment.

**LLDPE\_\_** Enveloping light emanating from a pure linear polyethylene body: produced by rotational moulding, the material is UV resistant, does not turn yellow or deteriorate, and helps ensure optimal light distribution.

**RANGE\_\_** This product family comes in various shapes and sizes featuring different power outputs, luminosity levels and color temperature suited for a wide variety of applications. Sources that illuminate the facades and the perimeters of residential buildings, line pathways with lights or safely guide you through an underpass.

**VERSATILITY\_\_** My White is also MiniWhite, a range of small, extremely compact square or round wall lights. These minimal, bright jewels can be arranged in extremely creative patterns. The latest addition to the family, the brand new MyWhite versions are fitted with presence sensors making them ideal for the illumination of passageways or with auxiliary power supply.

**BRAND NEW\_\_** A bright new element complements the My White family. With its simple but creative design, MyWhite\_U gives a fresh interpretation of the concept of outdoor lighting: a touch of originality combined with LED technology within a durable and reliable structure, designed for the illumination of facades, porches and passageways.
