TAILOR MADE DESIGN

Our mission is to build a close relationship with designers, **looking for optimal results that can best highlight the beauty and design of the visual concept.** We deeply believe in this relationship and we are ready to put all our knowledge and technological savvy into the “creative mix”.

We study new solutions working side by side, as we are convinced that this synergy can give rise to ideal answers.

Walter Steiger | Paris – France

TECHNOLOGY AVAILABLE TO CLIENTS AND PRODUCTS DEDICATED TO THE PROJECT

Thanks to LED technology, today a lighting project is more articulated and precise than ever. We are able to offer immediate energy savings due to reduced consumption, clear benefits in terms of colour rendering and protection of the goods on display, thanks to fixtures devoid of harmful emissions.

We have developed ad hoc, simple and performing products, able to solve the problems traditionally related to installation, and achieve the versatile lighting required for this type of environments. Using latest generation sources allows us to reduce the size of the luminaires to a minimum, eliminating their visual impact when installed, as well as ensuring high quality and excellent luminous efficiency.

THE PERFECT LIGHTING:
OPTICALS' RESEARCH AND DEVELOPMENT.

Each LED is configured to emit a certain amount of light, which changes with the addition of the optical system. The task of defining the light beam coming out of the lighting fixture is entrusted to a dedicated optical system, whose proven efficiency optimizes the source output.

Continuous research, our know-how acquired over the years, and the development of lenses and reflectors designed around LEDs allow us to propose new technical applications that can maximize the experience of lighting design in a rigorous and effective way.

DESIGNED TO LAST OVER TIME: DISSIPATION ACCORDING TO i-LèD.

A quality product must be reliable and long lasting. Each fixture is planned and designed to fully express the potential of the source. In the design of a luminaire, aesthetics is not our only concern: indeed, the main role of the casing is to ensure that operating temperature stays below a certain threshold.

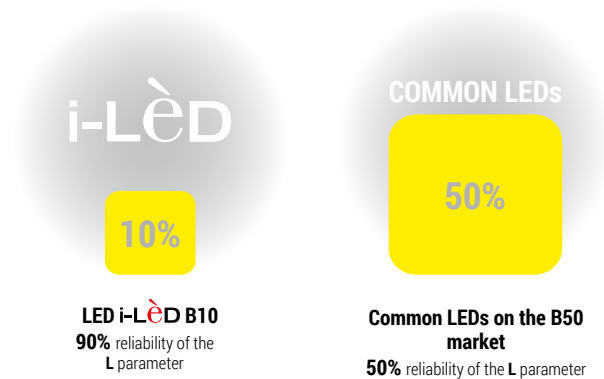

An LED luminaire can easily reach high temperatures, capable of altering its performance and life cycle. This is why it is essential to design an effective heat sink element, to increase performance and extend the life of the product.

Our lighting fixtures feature passive thermal dissipation: this allows the casing to always maintain temperatures below 60 degrees centigrade, optimizing the passage of heat from the printed circuit housing the LED to the external environment. The absence of active dissipation systems, such as fans, simplifies the mechanical and electronic structure of our products, thus ensuring greater overall reliability over time.

Temperature (Solid) [°C]
TMAX (°C) Radiator: contours

In the LED data sheet the value “**B**”, followed by a value normally included between 10 and 50, indicates the quality of the diode used as it defines the percentage of LEDs that, at the end of normal 223'824 hours, does not maintain the flow characteristics bright state. A LED declared as L70B10 = **223.824 hours** indicates that upon reaching **223.824 hours**, 90% (B10) of the diodes has a residual luminous flux equal to or greater than 70% of the initial flow (L70).

NOT ONLY AESTHETICS AND DESIGN

The Rendering Index (CRI) quantifies the ability of a light source to reproduce in a more realistic and natural way the colour shades of illuminated objects. Traditionally the CRI is defined through sample sources: 14 colour plates, characterized by different luminance levels.

The evaluation parameters are based on a scale ranging from 0 to 100.

CRI v

CRI colour range

TM-30 colour range

The 99 samples used to define the TM-30 are the result of a logarithmic selection obtained from the 105,000 colours visible to the human eye.

S TM-30 TEST METHOD

THE NEW ALPHABET OF LIGHT

IES TM-30 Colour Rendering Evaluation uses 99 sample colours (Colour Evaluation Samples - CES) that capture the colours of leaves, flowers, skin tones, paintings, and some original Munsell samples. The selected CESs are defined within the entire colour space, and include saturated and poorly saturated colours.

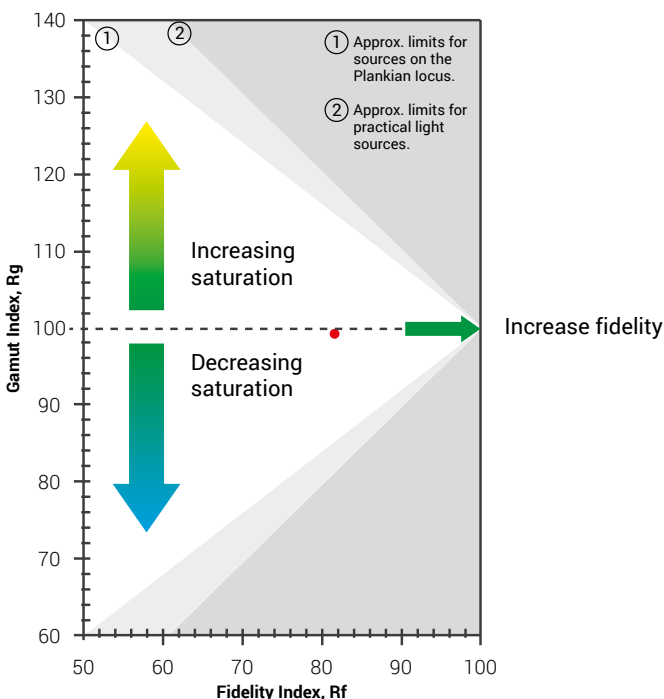

Unlike the CRI, the TM-30 proposes a metric made up of two indices, the fidelity value is max 100 and the gamut value is max 140:

- **Rf Fidelity Index**, similar to the CRI (Ra), with a maximum value of 100, which corresponds to the perfect reproduction between the samples and the reference source.
- **Rg Gamut Index**, which is inspired by the LRC Gamut Area (GAI) and calculated with reference to the dotted area in a chromatic diagram.

* IES (Illuminating Engineering Society) TM-30 15 (Technical Memorandum 30 - 2015)

** The Munsell system is a color space used as an international standard for defining colors based on three dimensional coordinates: hue, brightness (Value or Lightness) and saturation (Chroma).

SMARTWAVE™ 4.0

LONGER LIFE GUARANTEED

SURGE
Immunity

ESD
ElectroStatic
Discharge Protection

SMARTWAVE™
LED Control-Gear

CHIP
Control-Unit

Voltage fluctuations in the power supply system can compromise the fixtures' integrity and operation. Our response to this problem is **Smartwave™**, a specially designed series of power supplies that guarantee a longer service life.

Overvoltages, or surges, can occur due to numerous phenomena, including the classic lightning strike. These phenomena are responsible for most cases of malfunction of a lighting system, especially power supplies.

Smartwave™ power supplies can work with high input voltages, **up to 7 kV, without damage: a value that exceeds seven times the minimum level of protection according to current regulations.**

Electrostatic discharges (ESDs) can irreparably damage power supplies, which are often considered the weak point of an electronic appliance in terms of safety. Smartwave™ power supplies are tested with **discharges up to 30 kV** (the IEC EN61547 indicates 4kV as the minimum value for contact discharges and 8 kV for discharges in air).

In the same way, while the legislation provides for a maximum discharge per second, Smartwave™ is tested with **five shocks per second**. Our laboratory with specialized facilities means that I-Led products are tested in-house. In addition to testing immunity from SURGE and ESD, tests are also carried out to measure the emission of electromagnetic disturbances.

DALI

DIGITAL ADDRESSABLE LIGHTING INTERFACE

Linea Light Group has ProbitLab, a hardware platform developed to internally verify the effectiveness of programming commands, the quality of input signals and the effective correspondence of the output. Used in combination with ProbitBench, it allows to perform the homologation tests defined by the IEC 62386 standard and to distribute top-quality products with the official DALI brand.

Testing a product several times:

here's how we assure our customers an extremely reliable DALI system for digital control of lighting.

DALI Lamps registered producers and affiliated with DiiA (Digital Illumination Interface Alliance)

WE STRICTLY TEST
OUR PRODUCTS

TESTED / APPROVED

All tests are carried out internally by means of sophisticated instruments and under the control of highly qualified personnel, in compliance with current regulatory standards:

- Junction temperatures
- Photometric surveys
- Impact resilience test (ik)
- Fire resistance testing
- Salinity test
- Walk-over and drive-over resistance tests
- Protection test (ip, iec 60529 standard)
- Checking of solar radiation resistance
- Vibration and mechanical stress tests
- Climate tests

Generic tests carried out in addition to the electronic ones include:

- Test surge
- ESD test
- DALI compatibility test

5 YEARS WARRANTY

Linea Light Group offers a five-year warranty on its products for manufacturing defects. The specific activation form to be filled is available on our website www.linealight.com

If the procedure is not activated, the guarantee provided for by the current regulation remains valid.

All products must be installed using Linea Light Group's original or certified power supply devices, cables and accessories. Products with non-original or non-certified parts are not covered by the product warranty.

PROJECTORS UNDER THE SPOTLIGHTS

projectors pound

Completely redesigned for look and performance, Pound offers a complete range of sleek track spotlights with **excellent lighting performance** and an **essential design**.

Available in four sizes, Pound can be combined with Balance - CRI 92, Specialty - CRI 98 e Fidelity - CRI 98 LEDs.

The proposed optics, Spot (15°), Medium Flood (30°) and Flood (60°), are interchangeable and can be integrated with beam and glare control Accessories.

projectors optus_T

Optus is a new range of products designed for the retail sector: their **clean shapes** and **small sizes** can be combined with track and channel Creek spotlights, pull-out ceiling recessed luminaires, window lighting.

Optus_T is available in two sizes and can be combined with Balance, Saturation and Accuracy LEDs.

The available optics are Spot (15°), Medium Flood (30°), Flood (60°) and, only for the larger version, Wide Flood (90°). They are interchangeable and can be integrated with light and glare control accessories.

The electronics is inserted in the external compartment and can be integrated with the Eye Wi-Fi system, which allows direct control and monitoring of individual luminaires using apps on smartphones and tablets.

track system three-phase + DALI

Suspension

Recessed

Epoxy powder-coated extruded aluminium electrified track. 36 x h 33 mm rectangular section with asymmetric profile for proper fitting of the modules. Four PVC insulated copper conductors with a 4 mm² cross-section (three phases and a neutral max. 16 A). Integrated 4mm² aluminium earthing conductor.

3 separate switching circuits available. Available in the recessed version with side clips for false ceiling installation. To be used with track spotlights fitted with European standard adapters.

Materials

Die-cast aluminium

TRACK SYSTEM THREE-PHASE + DALI

WIRING DIAGRAMS

The connection to a 230/250V single-phase electric power system allows a total load of 16A, which corresponds to 3680/4000 Watt that can be divided into three circuits.

The connection to the 230/400V three-phase electric power system allows a total load of 16A, corresponding to 11040 Watt, which can be split in three circuits (3x3680 Watt).

LOAD CAPACITY

The three-phase tracks can bear a load of 2kg every 200 mm with a maximum distance of 800 mm between fixing points.

With 10kg load every 200 mm, the fixing distance must be 400 mm.

-----------	-------

CONTINUITY OF GROUNDING

For a correct installation of all the accessories that contribute to the composition of a three-phase track system, the continuity of the grounding line between each element is important.

As shown by the section of the track shown on our side drawing, the position of the grounding line (in red) is asymmetrical in regards to the central axis of the track; on the basis of this structural difference it is possible to distinguish the right part (which includes the grounding line) that constrains the insertion of all the accessories.

The positioning of the earth conductor must be placed between the accessory and the structure of the electrified track.

PLAN VIEW

AXONOMETRIC VIEW

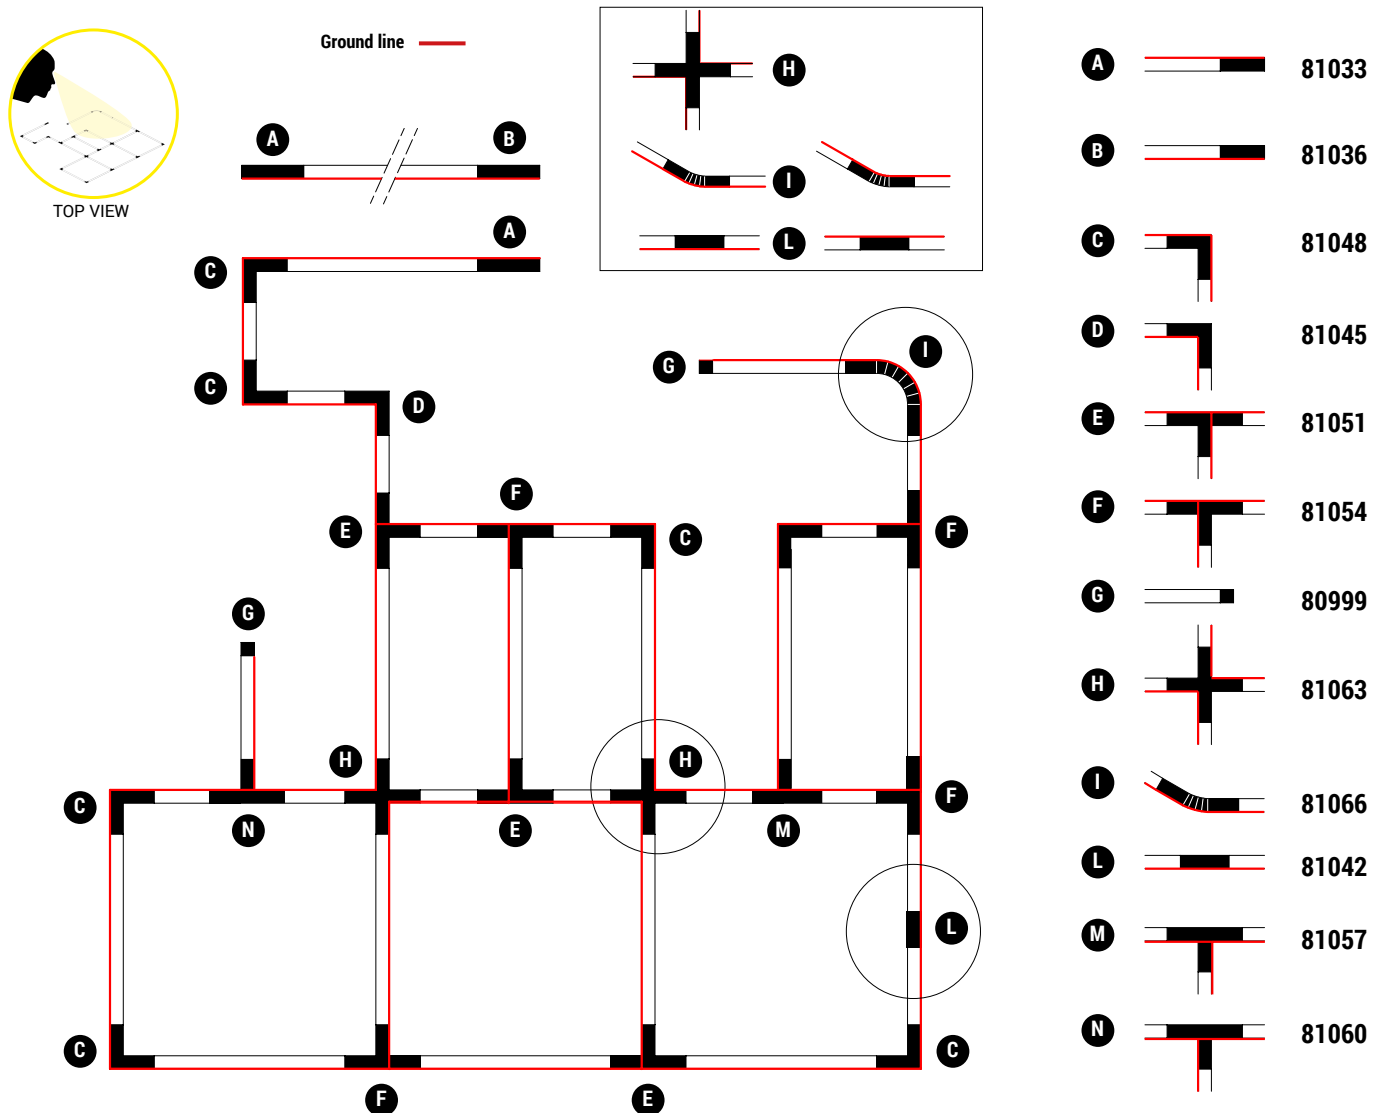

CONFIGURATION

For a correct design, we suggest to compose the structure with a plan view from above, as shown in the following drawing:

OVERHEAD VIEW

Accessories "H", "I" and "L" can be used in both directions.

projectors optus W

Optus is a new range of products designed for the retail sector: their **clean shapes** and **small sizes** can be combined with track and channel Creek spotlights, pull-out ceiling recessed luminaires, window lighting.

Optus_W is a range of wall luminaires specifically designed for window lighting: the aluminium front carter protects the observer from dazzling, while the adjustable modules (two or three depending on the model) provide ideal lighting for the items on display.

Optus_W can be combined with Balance - CRI 92, Specialty - CRI 98 e Fidelity - CRI 98 LEDs. Available with Spot (15°), Medium Flood (30°) and Flood (60°) optics. These are interchangeable and integrated with beam and glare control accessories.

Complete composition

projectors creek

Without an external frame, Creek allows the installation of highly flexible professional lighting solutions. Its ingenious installation system facilitates mounting of the fixtures to the structure in the false ceiling (carter and track spotlights) without tools, and in a few simple steps.

Creek is the ideal choice for any retailer who wants to create an atmosphere that fits with his concept of visual merchandising. Its winning features are freedom of application and discreet blending with the surrounding space.

- 9 | Linear carter (900 mm)

MAIN FEATURES

The track spotlights are powered by a single line, regardless of their number.

Six different luminaires available, depending on lighting requirements.

The structure is assembled depending on the size of the false ceiling.

"PLUG & PLAY" connection with wired power supply.

STEP 1

Once the structure has been set up in the false ceiling, the swing arm is inserted: the lighting fixture is at one end and the fixing base at the other end.

STEP 2

Fixing is carried out through snap-fit mounting, by inserting the base end in the profile inner seat.

STEP 3

The process is completed by pressing down the base near the point where the swing arm is inserted.

STEP 4

The lighting fixture is ready to be extracted and pointed. It may also be moved along the structure by pressing two flaps and sliding the fixing base.

large scale distribution fresh food

The great influence that professional lighting can have on customers' impressions is often overlooked by traders. Used in a skilful way, lighting can be very profitable, especially in supermarkets and food stores (bakeries, butcher shops, greengrocers, ...). There are indeed many benefits that can be drawn from LED lighting specially designed for food displays.

SPECIFIC TRACK SPOTLIGHTS FOR FOOD DISPLAYS

FRESH

The right lighting system increases sales and directs customers' attention to quality rather than to price. Naturally, protection against heat and ultraviolet rays is essential. Specially designed LEDs that can reduce radiation to a minimum and are specific for each type of food (meat, fish and bread) are the best solution for this purpose.

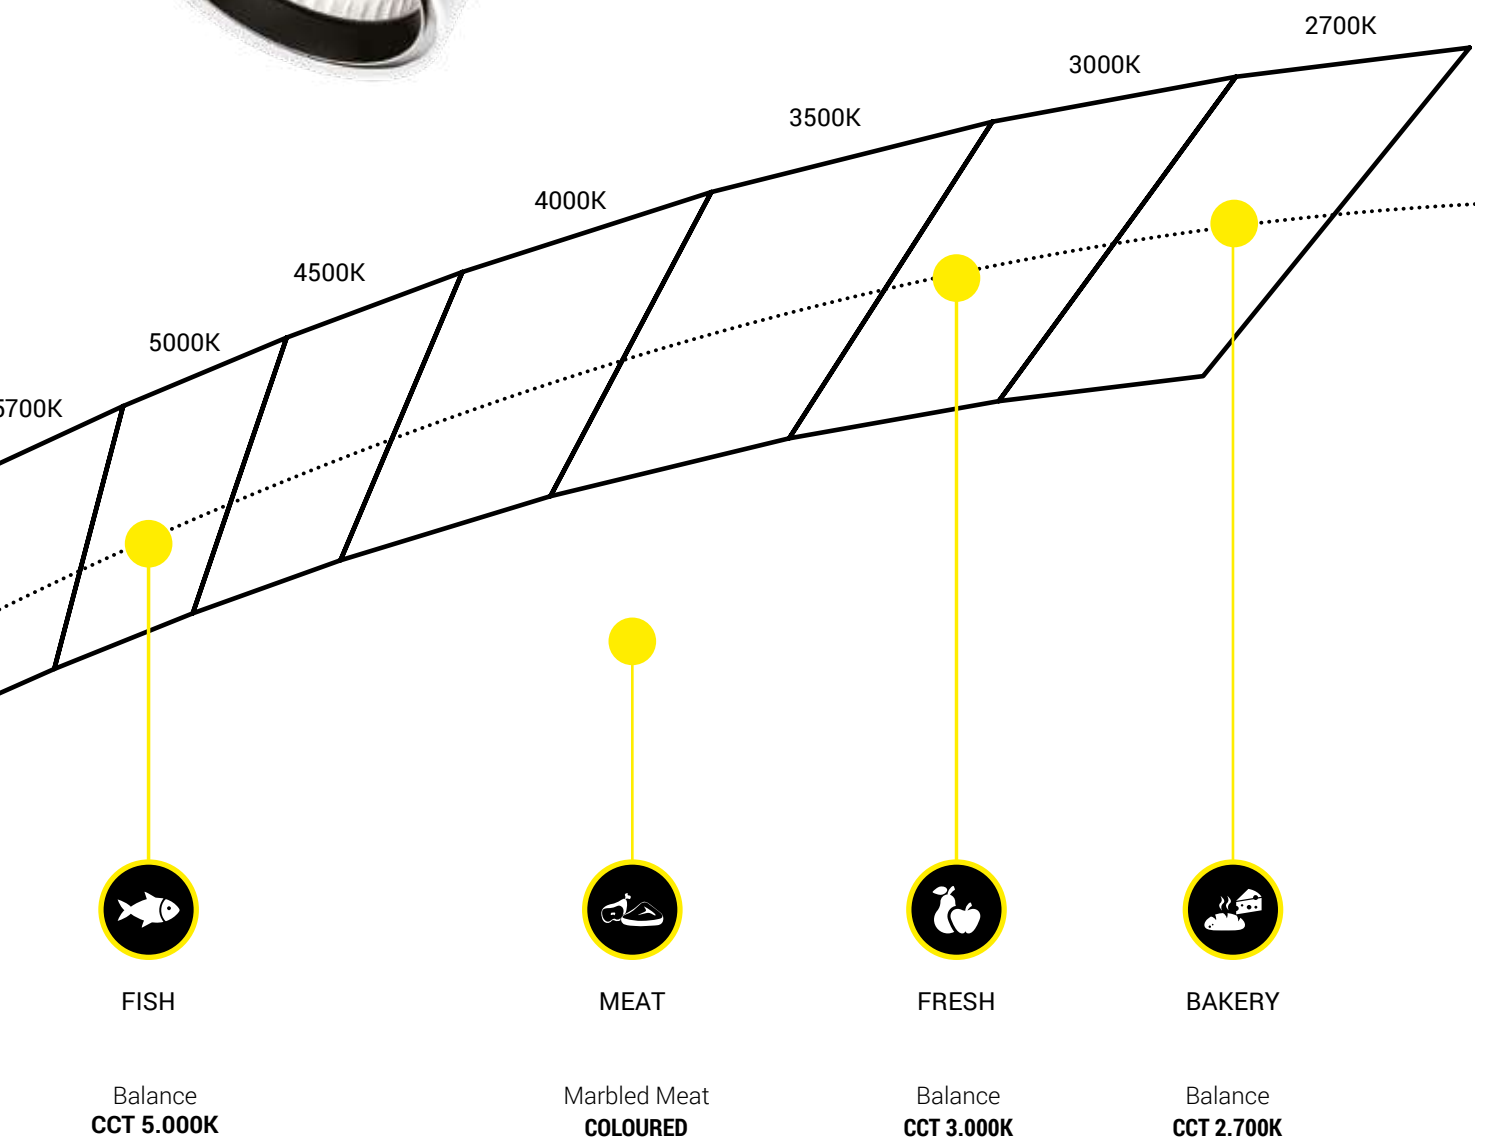

- EXCELLENT COLOUR RENDERING
- VERY LOW UV RAYS EMISSION
- COLOUR TEMPERATURE (K)
- DEDICATED EMISSION SPECTRUM
- HIGH ENERGY SAVING

FISH - 5000K

All food contained in refrigerators and freezers gain freshness with a very white light. The cold colours have a strong emotional effect: freshness and storage capacity are estimate intuitively better in environments that appear cold.

Light for fish and frozen foods

MEAT - ↓BBL (BELOW BBL)

The art of lighting meats and cured meats is closely linked to the careful use of colours. Enhancing the different shades of red in meat peaces contributes in giving a fresh and genuine appearance to the products. The white colour of bone and fat is not altered by light.

To display meats and sausages

FRESH - 3000K

Clear and bright light gives to fruits and vegetables a fresh and inviting look, like a colourful market on sunny days. Customers can not miss to notice the quality of the products.

To enhance the freshness of fruit and vegetables

BAKERY - 2700K

The bread looks appetizing and crispy when the light absorbs its warm tone multiplying the effect. This increase of colour is also declined to cheese, which will be well presented according to their natural colours.

LINEAR PATHS OF LIGHT

trail linear LED trunking system

Trail is an innovative system of continuous LED lines offering the optimal lighting solution for particularly spacious areas in a sales environment. Its flexible design includes a wide variety of optics and three different powers. Trail features extraordinary efficiency, high brightness and is simple and fast to configure. Thanks to the topLED technology, Trail ensures significant energy savings with very low maintenance, thus speeding up initial investment payback time.

Materials

Steel (cap)

Extruded aluminum (lamp body)

VERSATILE, EFFICIENT AND EASY TO INSTALL

**HIGH EFFICIENCY**

Trail's great energy efficiency (up to 176 lm / w) and limited maintenance allow greater savings compared with the operating costs of traditional fluorescent systems.

**QUALITY LIGHT**

Trail a1:f109 uniform and contrast-free illumination, lasting lighting with quality guaranteed by the scrupulous selection of perfectly compatible components.

**FUNCTIONAL VERSATILITY**

Trail's characteristic modularity allows tailor-made configurations by selecting the most suitable lighting solution for each particular environment.

**EASY INSTALLATION**

Installing a trail continuous line is quick and easy: once the supporting structure is in place, the quick-fit system allows placement of individual lighting units to get the most suitable lighting for the space layout.

**REDUCED MAINTENANCE**

High quality components also ensure the system's longevity, drastically reducing maintenance.

**NEW CARTER AND QUICK RELEASE**

A new locking and release system thanks to new pressure springs. The model is also updated in the choice of material, pre-galvanized steel instead of aluminium.

**NO TOOLS AND REDUCED INSTALLATION TIMES**

No tools are required to install and connect trail, the technician can now work in total freedom. Assembly time is reduced by 45% compared to the previous version.

**NEW TRACK VERSION**

A new model was included in the range thanks to small changes in the wiring and earth leakage protection that allows adding a new track.

**UPS VERSION (UNINTERRUPTIBLE POWER SUPPLIES)**

Available on request for trail is the emergency light management system thanks to the ups wiring.

SPECS

WIDE RANGE OF OPTICS FOR EVERY NEED

ASYMMETRIC AND BI-ASYMMETRIC OPTICS

Side aisles (asymmetric) and centre aisles (biassymmetric) with shelves 2,20 m high. Installation height 3,5 m.

Bi-asymmetric optics, specifically designed for the central aisles of supermarkets, performs the dual function of general, comfortable lighting and guiding customers in the purchasing process.

The special lens directs the light sideways to focus attention on the shelves while reducing glare in transit areas. Customers' eyes are focussed on the displayed goods, making the purchase experience easier.

DIFFUSED OPTICS

Checkouts, gondolas and shelves max 1,50 m high.
Installation height 3,5 m.

The diffused lens is suitable for the uniform lighting of shelves and aisles.

In chain stores Trail provides uniform illumination for entrances, checkouts and areas occupied by gondolas and low shelving. It can also be used to illuminate spaces without shelves and production departments.

System design is not bound by store layout, allowing settings to be restyled without having to reset any directional pointing.

60° OPTICS

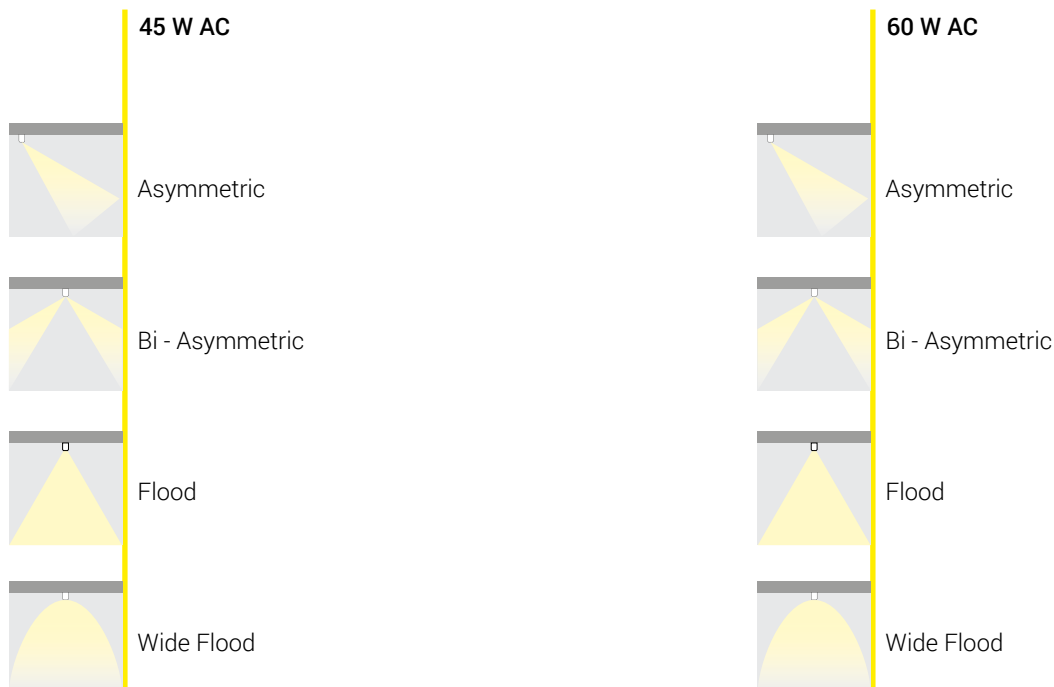

Small warehouses and storerooms with shelves up to 6 m high. Installation height 8 m.

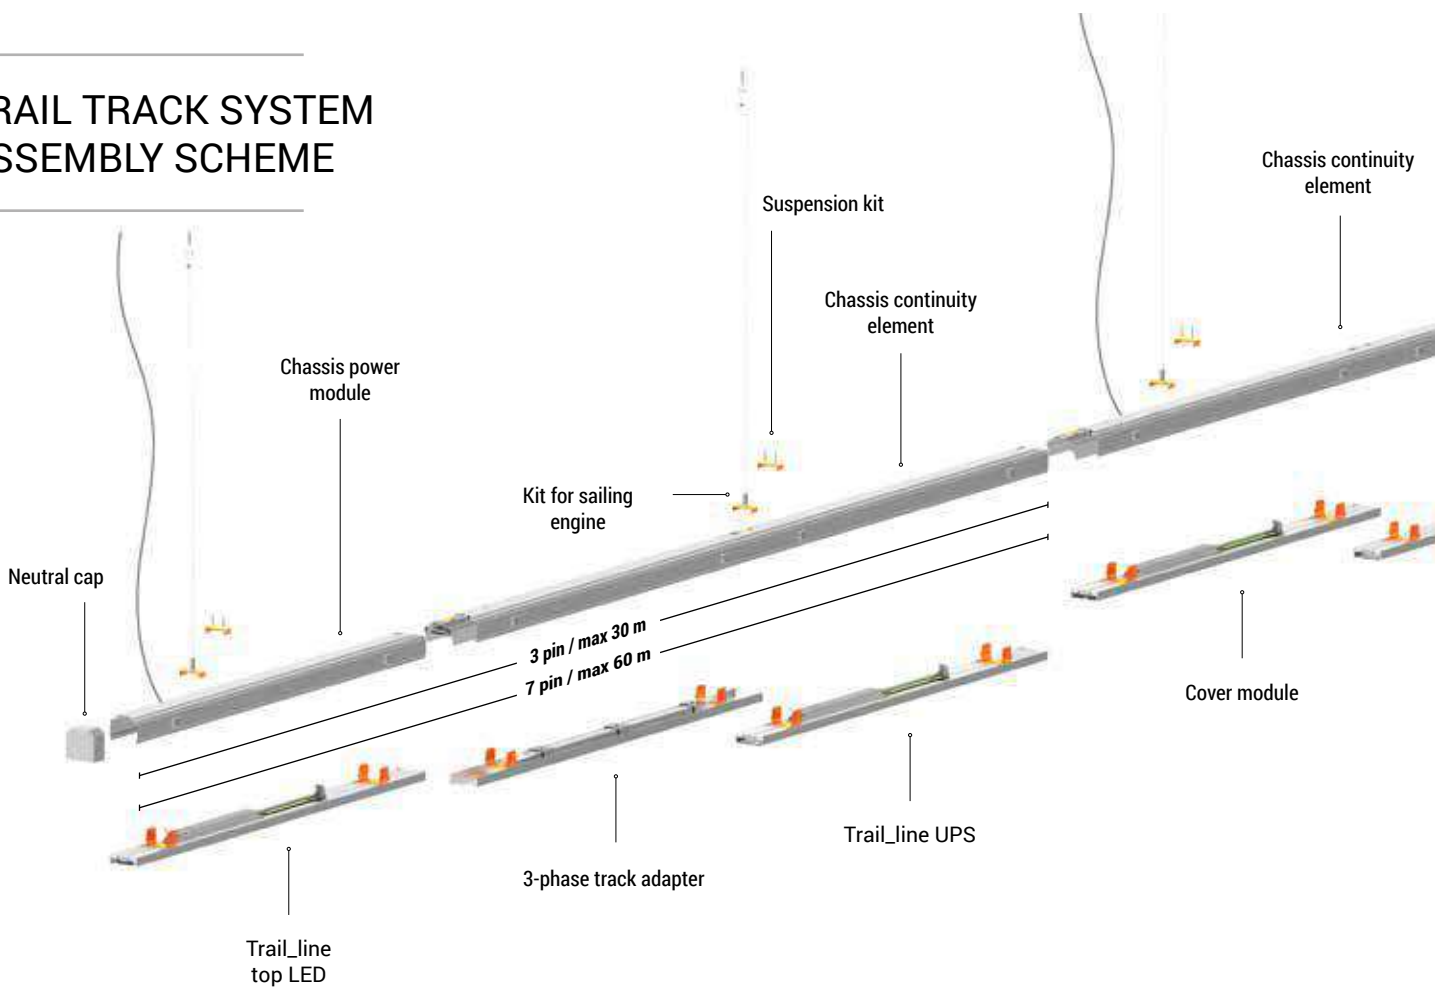

Trail_line with 60° medium-flood optics can replace the diffused version to fulfil the general lighting function in environments with ceiling heights up to 8 m.

In traditional chain store contexts it can be used for the direct lighting of gondolas, low display units and refrigerated sections, focussing customer attention on free-standing elements.

60° optics is also used in small warehouses and goods storage areas, where it ensures optimised, uniform lighting on aisles and racks.

bulbo collection

Bulbo Collection lighting fixtures emit a coloured light resulting from the combination of light frequencies. These are selected to activate the photosynthesis process and stimulate growth in plants, including in poorly lit or light-free environments.

The special light spectrum, studied at the laboratories of the *Department of Agricultural Sciences at the University of Bologna - Alma Mater Studiorum*, reproduces the amount of sunlight that plants naturally absorb. For an optimal result, each lamp will be switched on and off regularly in order to reproduce the natural day/night cycle.
Recommended: 15 hours ON and 9 hours OFF.

design Lorenzo Antonioni, 2016-2018

Technology available to nature for plants' growth in places without sunlight.
Versatile and carefully designed. Bulbo fixtures will give you the pleasure of seeing your plants grow healthier day after day.

DOWNLIGHTS LIGHT ACCENTS

downlights optus_ex

Optus is a new range of products designed for the retail sector: their clean shapes and small sizes can be combined with track and channel Creek spotlights, pull-out ceiling recessed luminaires, window lighting.

Optus_EX is a recessed and pull-out ceiling lighting fixture featuring a 350° rotation on the horizontal axis and a 65° tilt (from -20° to + 45°) on the vertical axis.

Available in two sizes, Optus_EX can be combined with Balance - CRI 92, Specialty - CRI 98 e Fidelity - CRI 98 LEDs; the available optics are Spot (15°), Medium Flood (30°) and Flood (60°). They are interchangeable and integrated with beam and glare control Accessories.

Materials

Die-cast aluminium

downlights illuminator

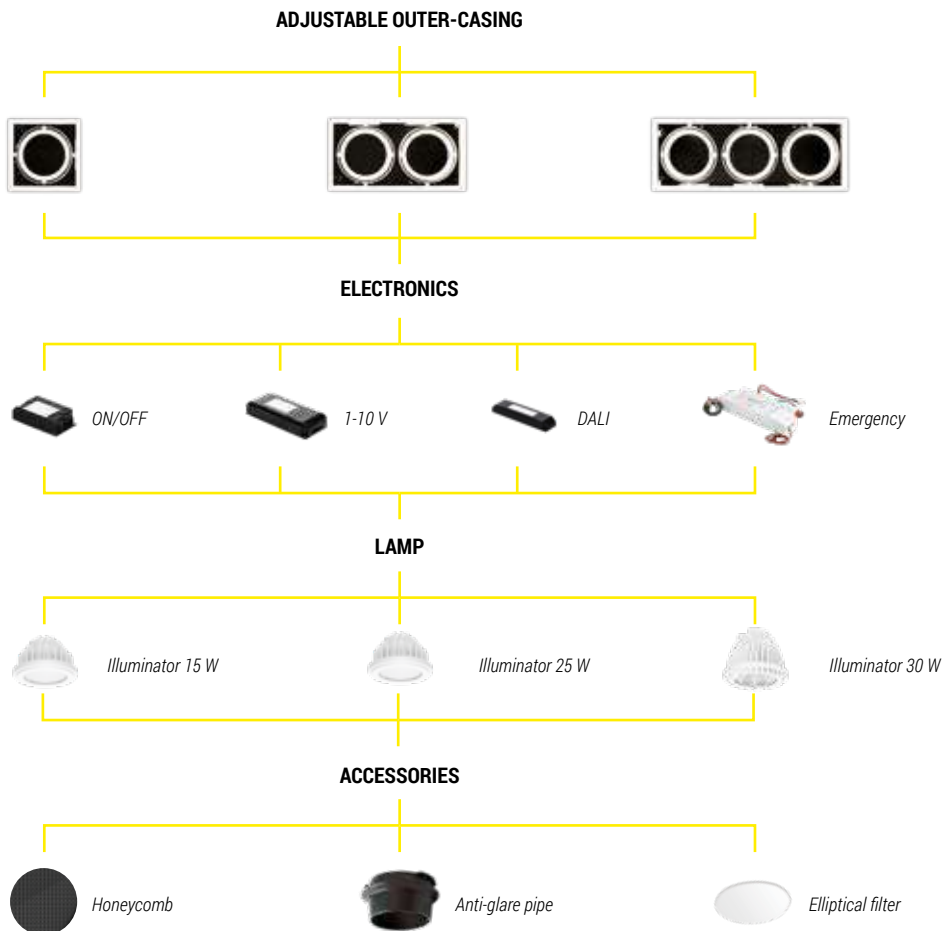

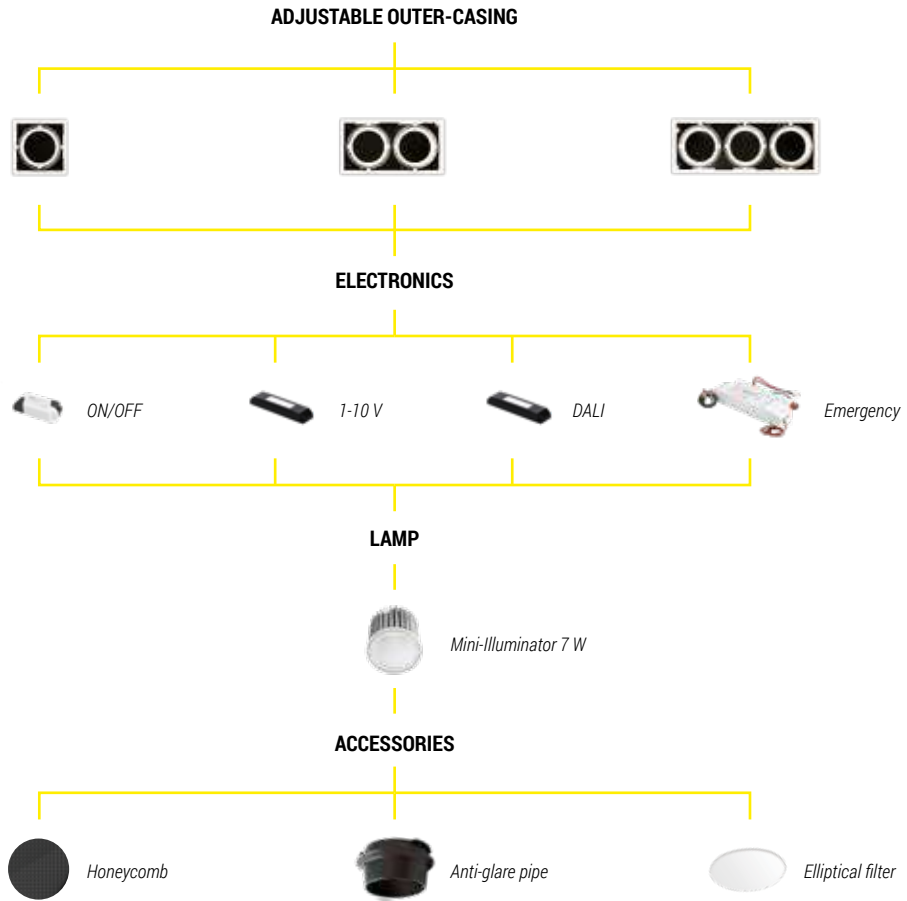

Illuminator is a series of modular luminaires for false ceilings mounting, available in two models with one, two or three adjustable modules.

The smaller version is compatible with luminaires with Balance - CRI 92 LEDs and Spot (15°), Medium Flood (30°) and Flood (60°) optics that can be integrated with beam and glare control accessories.

The larger version is compatible with luminaires with Balance - CRI 92 LEDs, and interchangeable Spot (15°), Medium Flood (30°) and Flood (60°) optics.

LE

downlights cob20

Recessed Cob20 is the result of careful research aimed at obtaining **outstanding performance** combined with **maximum ease of installation**.

The structure contains a reflective aluminium Optics compartment for **high-efficiency** emission, guaranteed by the Efficiency source. Cob20 is particularly suitable for the general lighting of public spaces: the proposed models can be powered with potential lower than required to ensure greater versatility of application.

Materials

Aluminum: heat sink and optics

Steel: brackets

ABS: flanges

LONG LIFE DURATION

Luminaires equipped with a high efficiency passive dissipation system with 6060 alloy extruded aluminum profiles. A compact beam radius exploits the maximum surface to efficiently cool down the LED source. Its characteristics are the material, the surface and the connection to the LED source.

The heat sink is built with extruded aluminum profiles joined in a compact diameter and arranged in such a way to have a wide cooling surface. Between the LEDs and the heat sink there is a special heat conducting film which guarantees optimal dissipation and consequently guarantees the long life of the item. **(70000 hours - L80).**

PASSIVE COOLING

50.3° C

23.3° C

This frame taken by thermal detector, reports the temperature levels of the lamp after few minutes from ignition at room temperature of about 22° C.

MAX TEMP. DETECTED **42.1° C**
MIN TEMP. DETECTED **23.3° C**

This frame was taken an hour after the lamp was turned on. Highly visible is how the generated heat by the LEDs is optimally dispersed by the heat sink placed in close contact with the part where the LED circuits are hosted.

MAX TEMP. DETECTED **50.3° C**
MIN TEMP. DETECTED **26.3° C**

SAFE AND EASY MOUNTING

The i-LèD technical laboratories have developed the innovative springs with “smart spring” technology. These springs include both the traditional version and the version with torsion technology and shaped hook. They are the perfect solution for the new i-LèD downlights since they allow quick and simple installation, without damaging the plasterboard or the surface where the downlights are to be mounted. Moreover, they allow to be safely fixed preventing it from accidentally falling also in case of environments exposed to heavy mechanical stresses (e.g. underground stations). The downlights of the COB series, fitted with torsion spring with shaped hook, may be conveniently installed and switched on during the construction phase without the reflector, which will be installed perfectly clean, once the construction works are completed. The i-LèD downlights can be installed on false ceilings with reduced thickness, ranging from 1mm to a maximum of 30 mm.

Torsion spring with shaped hook

 SMART LIGHTING

The Dynamic White modules, combined with the new specially developed management systems, **allow mixing of the whites from Warm White and Cold White**. It is possible to reproduce, with a single product, all the colour temperatures from 2700K to 6500K, **maintaining the same luminous flux**.

Recent studies on circadian cycles have shown how **variations in the temperature of natural light**, from dawn to dusk, **affect people's well-being**.

2700K

6500K

The LV44 items in the dynamic white version can be managed with a DALI driver with firmware 8.8. This driver allows you to use 8 on the same hardware addresses.

DYNAMIC WHITE TECHNOLOGY

SCIENTIFIC STUDIES HAVE PROVEN THAT REPRODUCING THE SAME FREQUENCIES IN THE INTERIORS OF PUBLIC SPACES CAN BRING BENEFITS TO THOSE LIVING AND WORKING IN THESE PLACES.

CEILING & SUSPENDED LINEAR ESSENCE

ceiling & suspended tour

Circular suspension with an essential and rigorous aesthetic. Three types of light: direct, indirect and internal. Available in two installation options, with parallel or stayed cables.

Materials

Calendered and painted aluminum.
Opal polycarbonate diffuser with patented fixing system.

SCALE 1:1
W 38 mm

FINISHING

White
RAL 9003

Black
RAL 9005

Nickel

Concrete

Bronze

Rose gold

The Tour frame is in calendered extruded and powder-coated aluminium.
No visible power cables; the topLEDs are powered through special super-thin cables. The opaline polycarbonate screen is snap-fitted in the profile thanks to a special patented system.

RANGE

Four different diameters characterized by an extra-slim section that makes this suspension the ideal solution for any environment where diffused, uniform light is required.

EMISSIONS

Tour offers three different emissions: direct, indirect and lateral internal. Three light effects that can be assembled in countless combinations to customize any room with minimalist and contemporary lighting.

DIRECT EMISSION

INDIRECT EMISSION

LATERAL INTERNAL EMISSION

INSTALLATION

The installation system offers different solutions for different types of applications. Tour can be installed with converging cables in a single central rose, or with adjustable hangers to allow proper traction of the cables. An ideal solution also when multiple configurations are required.

ceiling & suspended baton

Cylindrical suspension in coated steel, available in various diameters, lengths and finishes. Ideal as a single light point to create **refined and elegant atmospheres**, it can be installed in compositions of different sizes, finishes or heights.

Light control is facilitated by a special integrated lens, visual comfort is guaranteed by the backward position of the LED source.

Materials

Coated steel

RANGE

Two sections in four different lengths characterize the versions available in the range. Extremely minimal when used individually, Baton is able to create impressive light scenarios if combined in more modules, playing with the various shapes available.

CONTROLLED EMISSION

Baton creates high-contrast lighting effects. Through the lens integrated inside the body, the light beam is characterized by sharp edges, effectively emphasizing the lit items. The backward position of the LED makes this suspension extremely comfortable to the eye, and ideal for tables and bar counters in particular.

FINISHES

Powder-coated in a matt white or matt black finish, the aluminium bodies blend perfectly with the architectural space. The inner part of the Optics unit characterizes the product with a touch of colour, matt black and matt gold.

Exterior matt white/black
Interior Optics matt black/gold

ELECTRONICS CREATING CONNECTIONS

Defender | Over voltage protection

UN	IN	IMAX	ITOT	Uoc	UP	
230V AC	5kA	10kA	20kA	10kV	≤ 1.5kV	99341

U_n	Nominal operating Voltage
I_n	Nominal impulse discharge current
I_{max}	Total impulse current (L+N+PE)
I_{tot}	Max. total impulse current (L+N+PE)
U_{oc}	Surge protection level [L-N] [L+N+PE]
UP	Voltage protection level [L-N] [L/N-PE]

Surge arrester for T3 type indirect discharges (CEI EN 61643-11 / A11) with test classification III (CEI EN 61643-11 Ed.1).

Multi-pole overvoltage arrester with spark gap and varistors connected in series to the active phases.

Combined voltage limiting and switching SPD

No leakage current.

No secondary mains current due to the combined varistor/spark gap series.

INSTALLATION RULES

The installation of a single arrester upstream on each line may not be sufficient to guarantee effective protection for the entire system.

All luminaires installed at a distance of 10 m downstream of the arrester are considered to be 100% protected.

If the length of the cable between the arrester and the luminaires exceeds 10 m, it is recommended to renew the protection by placing another arrester near the devices to be protected (within 10 m).

In order to guarantee the maximum level of protection, install the arresters in the manner described above for each line of the appliance.

Bit | On/Off Driver 100~240V AC / 180~275V DC

44

range	output	input	eff.	PF	surge	
7 W arrayLED	700mA 10V	100~240V AC	80%	0.6 C	0.5 kV	99243
10 W arrayLED	300mA 36V	100~240V AC	80%	0.6 C	0.5 kV	99370

Self-resetting protection against overheating, overload, open circuit and short-circuit on the output line.

Slim | On/Off Driver 190~250V AC / 180~275V DC

29

range	output	input	eff.	PF	surge	
1-2 W powerLEDs	350mA 6.6V	190~250V AC	80%	0.6 C	4 kV	89144
2-4 W powerLEDs	630mA 6.6V	190~250V AC	80%	0.6 C	4 kV	89147

Instantaneous output current limitation for LED protection at power up. A switch may be integrated on the output line. Self-resetting protection against output overheating, overload, open circuit and short-circuit on the output line.

Mini_Penny | On/Off Driver 190~250V AC / 260~360V DC

37

range	output	input	eff.	PF	surge	
1-2 W powerLEDs	350mA 6.6V	190~250V AC	80%	0.6 C	0.5 kV	89148
2-4 W powerLEDs	630mA 6.6V	190~250V AC	80%	0.6 C	0.5 kV	89151

Self-resetting protection against overheating, overload, open circuit and short-circuit on the output line.

Leon | On/Off Driver 180~300V AC

range	output	input	eff.	PF	surge	
18 W arrayLED	500mA 37V	180~300V AC	91%	0.95	4 kV	99106
25 W arrayLED	720mA 37V	180~300V AC	91%	0.95	4 kV	99147
33 W arrayLED	950mA 37V	180~300V AC	91%	0.95	4 kV	99239

Smartwave™: excellent efficiency, long operating life, surge protection, high PF.

Protection against overheating, overload, open circuit and short-circuit on the output line.

Leon_Easy-Plug | On/Off Driver 180~300V AC

range	output	input	eff.	PF	surge	
15 W arrayLED	400mA 37V	180~300V AC	91%	0.95	4 kV	99113
25 W arrayLED	720mA 37V	180~300V AC	91%	0.95	4 kV	99112
30 W arrayLED	840mA 37V	180~300V AC	91%	0.95	4 kV	99093

Easy Plug connector included. Smartwave™: excellent efficiency, long operating life, surge protection, high PF.

Protection against overheating, overload, open circuit and short-circuit on the output line.

Clerk | On/Off Driver 180~300V AC

range	output	input	eff.	PF	surge	
40 W arrayLED	1.1A 37V	180~300V AC	92%	0.98	5 kV	99252

Easy Plug connector included. Smartwave™: excellent efficiency, long operating life, surge protection, high PF.

Protection against overheating, overload, open circuit and short-circuit on the output line.

Boson | N/O button 1-10V Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge
1-15 W powerLEDs	350mA 45V	190~250V AC	87%	0.6 C	4 kV 99115
18 W arrayLED	500mA 37V	190~250V AC	87%	0.6 C	4 kV

Selection of output current intensity via dedicated terminal.
Self-resetting protection against over-temperature, overload, open circuit and short-circuit on the output line.
Settings via 1-10V interface, potentiometer, or N/A button. Possibility of connecting up to 50 drivers (via the Sync bus).

Boson_Easy-Plug | N/O button 1-10V Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge
15 W arrayLED	400mA 37V	190~250V AC	87%	0.6 C	4 kV 99116
23 W topLED	630mA 36V	190~250V AC	87%	0.6 C	4 kV 99262

Easy Plug connector included. Selection of output current intensity via dedicated terminal. Self-resetting protection against over-temperature, overload, open circuit and short-circuit on the output line. Settings via 1-10V interface, potentiometer, or N/A button.
Possibility of connecting up to 50 drivers (via the bus Sync).

Mini Jolly | 1-10V Multi Power 110~240V AC / 176~280V DC

range	output	input	eff.	PF	surge
11 W arrayLED	300mA 33V	220~240V AC	87%	0.95	0.5 kV 99572

Light regulation 0/0,5 - 100 %.
Interface (I=0,35 mA) or 100 Kohm potentiometer.
Multipower driver supplied with dip-switch for the selection of the output current. Protections against overheating and short circuits, against mains voltage spikes and against overloads.

Mini Jolly DALI | DALI Multi Power 110~240V AC / 176~280V DC

range	output	input	eff.	PF	surge
11 W arrayLED	300mA 33V	220~240V AC	87%	0.95	0.5 kV 99573

Features DALI dimming (0/0,5 - 100 %), compatible with standard DALI interfaces. Multipower driver supplied with dip-switch for the selection of the output current. Protections against overheating and short circuits, against mains voltage spikes and against overloads.

Planck | DALI Multi Power 100~240V AC

F M/M C.C. DALI IP40

range	output	input	eff.	PF	surge
1 - 12 W arrayLED	350mA 34V	100~240V AC	84%	0.9 C	4 kV 99373
1.5 - 12 W powerLED	500mA 24V				
1.5 - 12 W powerLED	600mA 20V				

DALI interface, suitable for 6W, 8W or 2 articles in series from 6W.
Electrical output intensity selected by dip-switch.

Photon | Push and Simply Dim DALI Multi Power 190~250V AC / 180~275V DC

F M/M C.C. Simply Dim DALI IP40

range	output	input	eff.	PF	surge
1-15 W powerLEDs	350mA 45V	190~250V AC	87%	0.6 C	4 kV 99114
18 W arrayLED	500mA 37V	190~250V AC	87%	0.6 C	4 kV
2-20 W powerLEDs	630mA 39V	190~250V AC	87%	0.6 C	4 kV

Settings via DALI interface or Simply Dim.
Optimization of the DALI transmission signal (burst immunity up to 4 kV).
Selection of current intensity via dedicated terminal.
Self-resetting protection against over-temperature, overcharge, open circuit and short-circuit on the output line.

Photon_Easy-Plug | Push and Simply Dim DALI Multi Power 190~250V AC / 180~275V DC

F M/M C.C. Simply Dim DALI IP40

range	output	input	eff.	PF	surge
15 W arrayLED	400mA 37V	190~250V AC	87%	0.6 C	4 kV 99131

Settings via DALI interface or Simply Dim.
Optimization of the DALI transmission signal (burst immunity up to 4 kV).
Selection of current intensity via dedicated terminal.
Self-resetting protection against over-temperature, overcharge, open circuit and short-circuit on the output line.

Argo | Push and Simply Dim DALI Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge	
2-24 W powerLED	630mA 39V	190~250V AC	87%	0.95	4 kV	99344
25 W arrayLED	720mA 37V	190~250V AC	87%	0.95	4 kV	99345
35 W arrayLED	950mA 37V	190~250V AC	87%	0.95	4 kV	

Settings via DALI interface or Simply Dim.
 Optimization of the DALI transmission signal (burst immunity up to 4 kV).
 Selection of current intensity via dedicated terminal.
 Self-resetting protection against over-temperature, overcharge, open circuit and short-circuit on the output line.

Argo_Easy-Plug | Push and Simply Dim DALI Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge	
25 W arrayLED	720mA 37V	190~250V AC	87%	0.95	4 kV	99330
30 W arrayLED	840mA 37V	190~250V AC	87%	0.95	4 kV	

Settings via DALI interface or Simply Dim.
 Optimization of the DALI transmission signal (burst immunity up to 4 kV).
 Selection of current intensity via dedicated terminal.
 Self-resetting protection against over-temperature, overcharge, open circuit and short-circuit on the output line.

Serban | Push and Simply Dim 1-10V DALI Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge	
25 W arrayLED	720mA 37V	190~250V AC	86%	0.95	4 kV	99268

Settings via DALI interface, 1-10V, Simply DIM.
 Optimization of the DALI transmission signal (up to 4 kV burst immunity).
 Possibility to choose between linear or logarithmic dimming, using a jumper.

Serban_Easy-Plug | Push and Simply Dim DALI 1-10V Multi Power 190~250V AC / 180~275V DC

range	output	input	eff.	PF	surge	
25 W arrayLED	720mA 37V	190~250V AC	86%	0.95	4 kV	99188
30 W arrayLED	840mA 37V	190~250V AC	86%	0.95	4 kV	99187
35 W arrayLED	950mA 37V	190~250V AC	86%	0.95	4 kV	99241
40 W arrayLED	1.1A 37V	190~250V AC	86%	0.95	4 kV	99254

Settings via DALI interface, 1-10V, Simply DIM.
 Optimization of the DALI transmission signal
 (up to 4 kV burst immunity).
 Possibility to choose between linear or logarithmic dimming,
 using a jumper.

DUALdrive 560/A| DALI Multi Power 120~277V AC / 120~240V DC

range	output	input	eff.	PF	surge	
10 W topLED	350mA 39V	120~277V AC	89%	0.9 C	2 kV	99522
20 W topLED	600mA 39V	120~277V AC	89%	0.9 C	2 kV	99523
30 W topLED	840mA 39V	120~277V AC	89%	0.9 C	2 kV	99524
44 W topLED	1.25A 39V	120~277V AC	89%	0.9 C	2 kV	99525

Settings via DALI interface.

Theo | Push and Simply Dim 1-10V DALI Multi Power 180~300V AC

range	output	input	eff.	PF	surge	
66 W topLED	1.8A 37V	180~300V AC	90%	0.95	5 kV	99155

range	output	input	eff.	PF	dim
6 W arrayLED	500mA 12,5V	100~240V AC	84%	0.9 C	1:100%
12 W powerLED	500mA 24V	100~240V AC	84%	0.9 C	1:100%
8 W powerLED	600mA 12,5V	100~240V AC	84%	0.9 C	1:100%

Smartwave™: excellent efficiency, long operating life, surge protection, high PF.
 Settings via DALI interface, 1-10V, Simply DIM.

Reson_150 | On/Off Driver 190~250V AC / 180~275V DC 150 W

range	output	input	eff.	PF	surge	
1-150 W topLED	6.25A 24V	190~250V AC	95%	0.98	5 kV	99331

Suitable for powering LED strips at constant voltage.
Self-resetting protection against output open circuit and short-circuit on the output line.
High efficiency, long operating life and high PF.

Reson_75 | On/Off Driver 190~250V AC / 180~275V DC 75 W

range	output	input	eff.	PF	surge	
1-75 W topLED	3.12A 24V	190~250V AC	91%	0.96	4 kV	99374

Suitable for powering LED strips at constant voltage.
Self-resetting protection against output open circuit and short-circuit on the output line.
High efficiency, long operating life and high PF.

Nyquist | N/O button Multi Channel 3ch. 24V DC 216 W

range	output	input	eff.	
3ch. x (1-72 W topLED/ch.)	3A 24V	24V DC	95%	99077

Suitable for powering LED strips, LEDs 5 mm and topLED at constant voltage.
Dimming from 0 to 100% using the N/A button.
Each Driver can perform as a master or as a slave.
Up to 20 drivers may be connected via the Sync bus.

Bode | DALI 1-10V Multi Channel 3ch. 24V DC 216 W

range	output	input	eff.	
3ch. x (1-72 W 5mmLED/ch.)	3A 24V	24V DC	95%	99074
3ch. x (1-72 W stripLED/ch.)	3A 24V	24V DC	95%	
3ch. x (1-72 W topLED/ch.)	3A 24V	24V DC	95%	

Suitable for powering LED strips, 5 mm LEDs and topLED at constant voltage. Adjustment via DALI interface, 1-10V or potentiometer.

Ervin | Converter 24 V 120 W

 C.V.  

range	output	input	eff.	PF	surge
1-120 W topLEDs	5A 24 V	24 V DC	95%	0.9 C	4 kV 64576

Suitable for powering StripLEDs and TopLEDs at constant voltage.
Adjustment via DALI interface.

Reson_150_1-10V | 1-10V Driver 190~250V AC / 180~275V DC 150 W

 C.V.  

range	output	input	eff.	PF	surge
1-150 W topLED	6.25A 24V	190~250V AC	95%	0.98	5 kV 99332

Suitable for powering LED strips at constant voltage.
Self-resetting protection against output open circuit and short-circuit on the output line.
Adjustment via DALI interface, 1-10V or potentiometer.

Dali_PS1 | DALI Controller

DALI Power Supply

Transp. **99309** 230~240V AC CLAMP DALI Power Supply

Driver for 200 mA DALI BUS for DALI devices or control modules without power supply.
Driver for recessed mounting.

Dali_PS2 | DALI Controller

DALI Power Supply

White **99310** 230~240V AC CLAMP DALI Power Supply

Driver for 240 mA DALI BUS for DALI devices or control modules without power supply.
Driver suitable to be mounted on a 35mm DIN Omega track.

Dali_USB | DALI Controller

DALI Power Supply

Transp. **99308** 4.5~5V DC CLAMP DALI

PC/DALI interface.

It allows connecting a PC to the DALI system interface, addressing the individual drivers, managing scenes and groups.
The system must be integrated with free software "masterCONFIGURATOR".
Power supply through DALI cable and USB interface.

Dali_XC | DALI Controller

DALI Power Supply

White **99311** 15~16V DC CLAMP DALI

99309
Alimentatore

4 separate inputs for contacts/N.O. buttons.
Mode controlled via 2 rotary selectors.
Possibility to connect several DALI XC on the DALI line.
Power supply through DALI cable.
25 cm long connection cables depending on the terminal colours included.

Dali_Msensor | DALI Controller

DALI Power Supply

White **99312** 15~16V DC CLAMP DALI

Control based on ambient light and motion detection.
 Assignment of simple group through rotary switch.
 Possibility to connect several MSensors in a group and on the DALI line.
 It can be controlled remotely.
 Lighting and motion detection controls can be deactivated.
 Parameter control through configuration software.
 Power supply through DALI cable.

Dali_Msensor | DALI Controller

DALI Power Supply

White **99313** 15~16V DC CLAMP DALI

Control based on ambient light and motion detection.
 Assignment of simple group through rotary switch.
 Possibility to connect several MSensors in a group and on the DALI line.
 It can be controlled remotely.
 Lighting and motion detection controls can be deactivated.
 Parameter control through configuration software.
 Power supply through DALI cable.

Dali_RC | Remote Control and IR Controller

DALI Power Supply

Black **99334**

Accessory for DALI MSensor 99312 and 99313.
 Optional IR remote control.
 Switching on, switching off and dimming.
 Activation of automatic control of lighting (LUX).
 Retrieving five output values of fixed light.
 Individual control of the buttons assigned with configuration software.
 Setting the threshold control.
 With wall support.

CONTROL DIAGRAM - EXAMPLE

Sepic | Emergency 230~240V AC

range	output	input	eff.	PF	surge	
1-5 W stripLED	150mA 24V	230~240V AC	80%	0.55	1 kV	99339
1-4 W powerLEDs	350mA 14V	230~240V AC	80%	0.55	1 kV	

Switchable (on/off) with normal power supply by means of a switch on the L' and N' (switched line) input.
Automatic reset after replacing battery and/or LED lamp.
Supplied with Ni-MH 6 cell battery pack, "AA" series, 1600 mAh.

Boost | Emergency 190~250V AC / 260~360V DC

range	output	input	eff.	PF	surge	
13 W topLED	350mA 36V	190~250V AC	86%	0.9	4 kV	99085
12-15 W powerLEDs	350mA 45V	190~250V AC	86%	0.9	4 kV	
15 W arrayLED	400mA 37V	190~250V AC	86%	0.9	4 kV	99095
18-22.5 W powerLEDs	500mA 45V	190~250V AC	86%	0.9	4 kV	99089
20 W arrayLED	580mA 37V	190~250V AC	86%	0.9	4 kV	99096
23 W topLED	630mA 36V	190~250V AC	86%	0.9	4 kV	99086
24-30 W powerLEDs	630mA 45V	190~250V AC	86%	0.9	4 kV	
25 W arrayLED	720mA 37V	190~250V AC	86%	0.9	4 kV	99097
30 W topLED	840mA 36V	190~250V AC	86%	0.9	4 kV	99098
30 W arrayLED	840mA 37V	190~250V AC	86%	0.9	4 kV	
30 W topLED	840mA 40V	190~250V AC	86%	0.9	4 kV	
35 W arrayLED	950mA 37V	190~250V AC	86%	0.9	4 kV	99347
32 W topLED	950mA 36V	190~250V AC	86%	0.9	4 kV	
40 W arrayLED	1.1A 37V	190~250V AC	86%	0.9	4 kV	99242
50 W arrayLED	1.25A 37V	190~250V AC	86%	0.9	4 kV	99084
50 W topLED	1.25A 40V	190~250V AC	86%	0.9	4 kV	

Switchable (on/off) with normal power supply by means of a switch on the SL (switched line) input.
Automatic reset after replacing battery and/or LED lamp.
Electronic multi-level charging system.
Supplied with Ni-MH 6 cell battery pack, "AA" series, 1600 mAh.

98436
Cable and
connector

98440
Cable and
connector

Emergency light kit | Emergency 190~250V AC / 260~360V DC

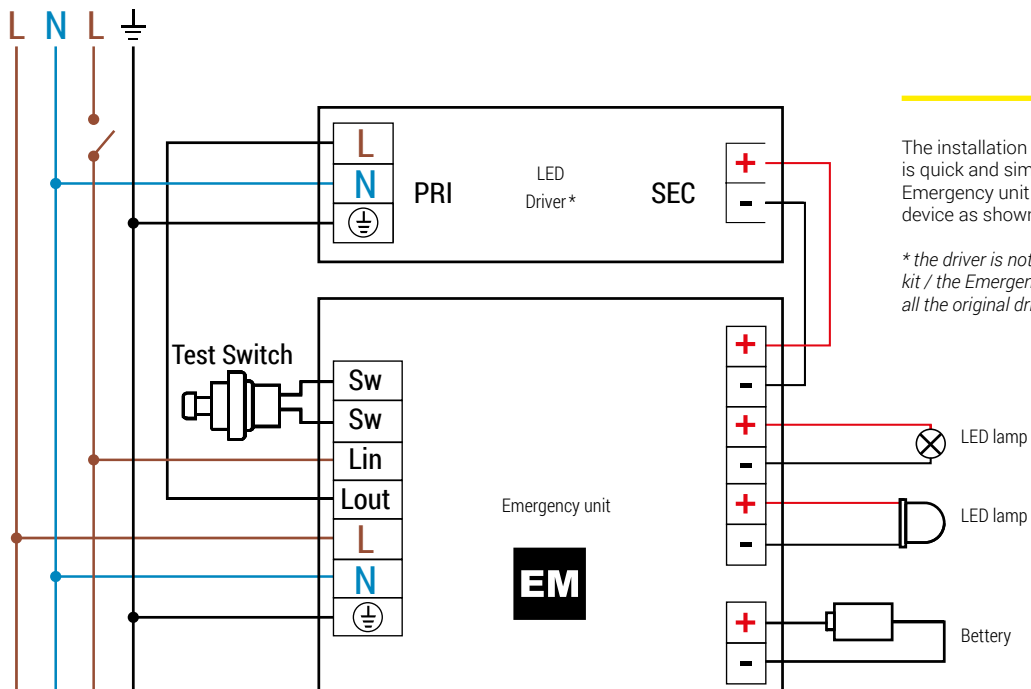

Switchable (on/off) in the presence of mains voltage via switch on SL input (switched line). Automatic reset following battery and/or LED lamp replacement. Electronic multilevel charging system. Supplied with 3000 mAh battery pack.

range	output	input	eff.	PF	surge	
Universal	6-60V 40-400mA	220~240V AC	86%	0.5	4 kV	99355
Frequency		50-60 Hz				
Nominal input current		40 mA (30 A inrush current with cold start)				
Outout voltage (without load)		6-60V				
TA Operating temperature		-25 +50 °C				
Max casing temperature TC		70 °C				
Control interface		Switch Line, Rest mode				
Protections		Overtemperature, overload, overvoltage, short-circuit, open circus				
Charge current		200 mA				
Emergency output current		400-40 mA				
Emergency power		2,4W				
Emergency output current		20 h				
Reference norms		EN 55015 (+A1+A2), EN 61000-3-3 (+A1), EN 61000-3-2 (+A2), EN 61547 (+A1), EN60598-2-22, EN61951-2, CEI EN 61347-1, CEI EN 61347-2-13, CEI EN 50366				

Unswitch Switch

The installation of the emergency kit is quick and simple: just connect the Emergency unit to the driver of the LED device as shown in the diagram.

* the driver is not included in the Emergency kit / the Emergency kit can be connected to all the original drivers of the LED device

**FAST AND EASY
TO INSTALL**

EYE-WiFi

Once an EYE-WiFi device is connected to the electricity grid, it will be detected by the EYE-WiFi Gateway and displayed via the EYE-WiFi APP.

NETWORK EXTENSION: you can easily add an EYE-WiFi device to an existing network at any time

VERSATILITY: it is possible to modify the configuration of the devices and groups simply by intervening on the APP with a click.

HOTSPOT MODE (without router).

For lighting systems independent of the LAN network. WiFi connection of the smart device (smartphone, tablet or PC) to the EYE-WiFi Gateway.

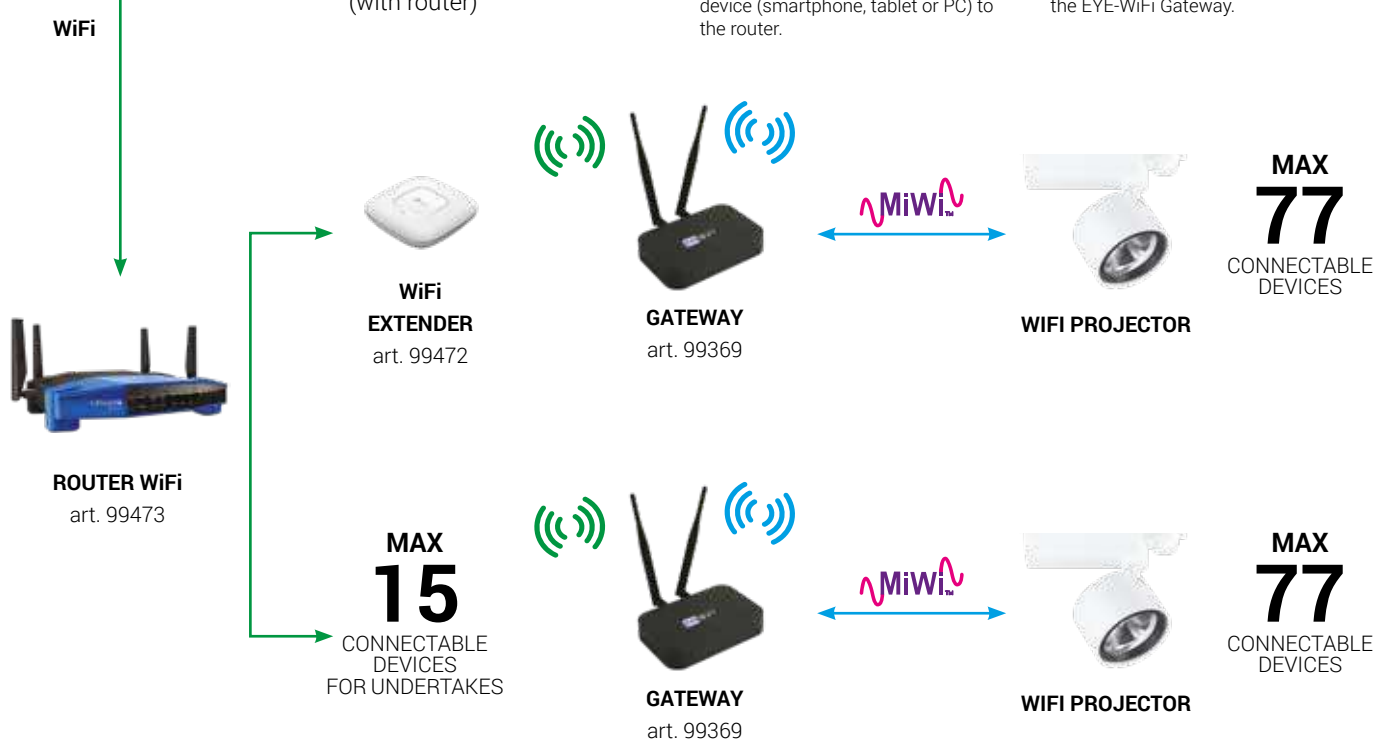

Access data via WiFi: see back of the EYE-WiFi Gateway. Ability to connect a maximum of two smart devices simultaneously.

CLIENT MODE (with router)

To control more than 77 EYE-WiFi devices. WiFi connection from smart device (smartphone, tablet or PC) to the router.

Access data via WiFi: check router specs. WiFi connection of the router to the EYE-WiFi Gateway.

Gateway

The mobile devices are connected through the Gateway EYE-WiFi, which converts WiFi signals into MiWi signals. This way, the EYE-WiFi technology can be used in all IT networks. If it is not possible to use your existing IT network, you can use the Gateway Hotspot function to create a stand-alone, independent WiFi network.

Network Standards

IEEE 802.11a/b/g/n

Radio Frequency Bands

2.4GHz

ATTENTION:

A Gateway EYE-WiFi can control up to 77 EYE-WiFi fixtures. As generic indications, we can provide the following maximum distances between Gateway EYE-WiFi and EYE-WiFi device:

- Alix_, maximum radius of 40m around the Gateway EYE-WiFi;
- Flamp_, Prolamp_, Alux_, maximum radius of 135m around the Gateway EYE-WiFi.

Linksys AC1900 WiFi Router

Simultaneous dual band (2.4 + 5 GHz) offers a stronger connection in a wider range than a single band with AC1900 speed. Equipped with 4 high-performance antennas, they provide optimum coverage and maximum signal strength even in large spaces or multi-storey buildings.

	Indoor Installation		Article protected by resin
	Outdoor Installation		Round installation hole
	Wall mounting		Fixture suitable for mounting on furniture
	Ground mounting		Fixture suitable for mounting on flammable surfaces (EN 60598)
	Ceiling mounting		Fixture with built-in thermal protection
	Wall or ground mounting		Simply DIM
	Ceiling or wall mounting		1-10 V
	Ceiling, wall or ground mounting		DMX 512
	Ceiling or ground mounting		DALI
	Stainless steel	C.C.	Constant Current
	Protection index (IEC 60529) from foreign bodies and water	C.V.	Constant Voltage
	Protection index (IEC 62262) against external mechanical impacts		Infrared
	Adjustable light beam		
	Tilting light beam		
	Walk-over lighting fixture		
	Drive unit (2,500 kg)		
	Power cable included		
	Class I - electrical insulation class (IEC)		All items are energy class A ++.
	Class II - electrical insulation class (IEC)		The values shown, unless otherwise stated, refer to the emission of the source and are susceptible to tolerances as shown in the following table:
	Class III - electrical insulation class (IEC)		Emission $\pm 7\%$ lm CRI ± 2 points on the typical value CCT ± 80 K Driver absorption $\pm 9\%$ W
	Driver included		
	Driver not included		The connection diagrams for the electronics items are available in the technical documentation.
	Over Voltage Protection
